## Periodic Products Awarded Australian Patent for Chelating Compounds and Related Applications

Fort Lauderdale, FL – May 9, 2014

Periodic Products today announced that the Company has been awarded Australian Patent No. 2008334043 for its patented chelating compounds. The patent, which is registered with the Australian Department of Innovation, Industry, Science & Research, also covers all related applications of the Company's chelating technology.

The Australian patent further enhances the Company's intellectual property portfolio as Periodic Products expands its international presence. According to Joseph Laurino, CEO and Company founder, Australia represents a significant market for the Company's technology.

"Mining represents 6% of Australia's GDP and 35% of all Australian exports," said Laurino. "Our unique metal-binding technology provides practical solutions that directly address the challenges associated with the mining and environmental remediation industries."

### About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok® is Periodic Products' patented chelating technology, and gives Periodic Products' polymers the power to rapidly and permanently remove metals from water. For more information on our technologies, visit [www.periodicproducts.com](http://www.periodicproducts.com).

### Forward-Looking Statements

To the extent any statements made in this release contain information that is not historical, these forward-looking statements are based on the current expectations of the management of Periodic Products only, and are subject to a number of factors, risks and uncertainties, including the acceptance and demand for new products, the impact of competitive products and pricing, new product development and launch, reliance on key strategic alliances, availability of raw materials, availability of additional intellectual property rights, availability of future financing sources, the regulatory environment, and other risks the Company may identify from time to time in the future that could cause actual results to differ materially from those described in the forward-looking statements.
