

FOR IMMEDIATE RELEASE

Periodic Products Awarded Chinese Patent for Chelating Compound and Related Applications

Fort Lauderdale, FL – April 14, 2014

Periodic Products today announced that the Company has been awarded Chinese Patent No. ZL200880118214.1 for its patented chelating compounds. The patent, which is registered with the State Intellectual Property Office of the People's Republic of China, also covers all related applications of the Company's chelating technology.

The Chinese patent further enhances the Company's intellectual property portfolio as Periodic Products expands its international presence, according to Joseph Laurino, CEO and Company founder.

"The United States, China and Japan comprise three significant markets for environmental remediation and mining," Laurino said. "Our unique metal-binding technology provides practical solutions that directly address real challenges associated with these industries. Our patents in the U.S., Japan, and now China, represent important drivers for the Company's success."

About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok® is Periodic Products' patented chelating technology, and gives Periodic Products' polymers the power to rapidly and permanently remove metals from water. For more information on our technologies, visit www.periodicproducts.com.

Forward-Looking Statements

To the extent any statements made in this release contain information that is not historical, these forward-looking statements are based on the current expectations of the management of Periodic Products only, and are subject to a number of factors, risks and uncertainties, including the acceptance and demand for new products, the impact of competitive products and pricing, new product development and launch, reliance on key strategic alliances, availability of raw materials, availability of additional intellectual property rights, availability of future financing sources, the regulatory environment, and other risks the Company may identify from time to time in the future that could cause actual results to differ materially from those described in the forward-looking statements.
