

FOR IMMEDIATE RELEASE

Periodic Products Awarded Grant from Florida Industrial and Phosphate Research Institute

Fort Lauderdale, FL – June 20, 2014

Periodic Products Inc. announced today that it has received a grant from the Florida Industrial and Phosphate Research (FIPR) Institute. The grant has been awarded to further demonstrate the commercial application of the Company's polymer-based metal extraction technology to the phosphate mining industry.

The project, entitled *Extraction and Recovery of Rare Earth Elements from Phosphate Using PX-107 and Chelok® Polymers*, will investigate using raw materials and waste by-products of the phosphate industry as potential sources of rare earth elements.

The Institute was created by the Florida Legislature to study energy, mining and mineral processing issues impacting the environment and economy of the state, as well as the health of Florida's citizens.

"We are excited about this research grant from the Institute," said Joseph Laurino, Periodic Products' CEO and founder. "We are especially enthusiastic about the efficacy of our Chelok® polymer, as the initial pilot data for the project showed that our technology was able to extract and isolate up to 91% of the rare earth elements in the sampled materials."

About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok® is Periodic Products' patented chelating technology, and gives Periodic Products' polymers the power to rapidly and permanently remove metals from water. For more information on our technologies, visit www.periodicproducts.com.

Forward-Looking Statements

To the extent any statements made in this release contain information that is not historical, these forward-looking statements are based on the current expectations of the management of Periodic Products only, and are subject to a number of factors, risks and uncertainties, including the acceptance and demand for new products, the impact of competitive products and pricing, new product development and launch, reliance on key strategic alliances, availability of raw materials, availability of additional intellectual property rights, availability of future financing sources, the regulatory environment, and other risks the Company may identify from time to time in the future that could cause actual results to differ materially from those described in the forward-looking statements.
