

FOR IMMEDIATE RELEASE

Periodic Products Awarded Japanese Patent for Plastics, Fibers and Related Applications

Fort Lauderdale, FL – January 14, 2015

Periodic Products today announced that the Company has been awarded Japanese Patent No. 5639166 for its proprietary plastics and fibers. The patent, which is registered with the Japan Patent Office, also covers all related applications of the Company's polymer technology.

The Japanese patent is the Company's tenth international patent for its family of polymers.

About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok® is Periodic Products' patented chelating technology, and gives Periodic Products' family of polymers the power to rapidly and permanently remove metals from water. For more information on our technologies, visit www.periodicproducts.com.

Forward-Looking Statements

To the extent any statements made in this release contain information that is not historical, these forward-looking statements are based on the current expectations of the management of Periodic Products only, and are subject to a number of factors, risks and uncertainties, including the acceptance and demand for new products, the impact of competitive products and pricing, new product development and launch, reliance on key strategic alliances, availability of raw materials, availability of additional intellectual property rights, availability of future financing sources, the regulatory environment, and other risks the Company may identify from time to time in the future that could cause actual results to differ materially from those described in the forward-looking statements.
