## Periodic Products Awarded Japanese Patent for Chelating Compound and Related Applications

Fort Lauderdale, FL – March 25, 2014

Periodic Products today announced that the Company has been awarded Japanese Patent No. 5475677 for its patented chelating compounds. The patent, which is registered with the Japan Patent Office, also covers all related applications of the Company's chelating technology.

According to Joseph Laurino, CEO and founder of Periodic Products, the Japanese patent further enhances the Company's intellectual property portfolio as Periodic Products expands its international presence.

"Securing patent protection in Japan is a significant accomplishment as we explore diverse applications for our technologies in the multi-billion dollar Asian marketplace," said Laurino.
