## Periodic Products Awarded Mexican Patent on Fundamental Technology for Metal-Binding Polymers

Fort Lauderdale, FL – February 4, 2013

Periodic Products today announced that the Instituto Mexicano de la Propiedad Industrial (Mexican Institute of Proprietary Industry) issued Mexican Letters Patent Number 300327, which covers fundamental aspects of the Company's Chelok<sup>®</sup> metal binding technology. This proprietary technology is applicable to multiple metal binding applications in several areas, including water purification and treatment, mining operations, corrosion prevention, and plastic and fibers.

According to Joseph Laurino, CEO and founder of Periodic Products, "This patent represents an important component of our growing intellectual property portfolio covering the metal-binding properties of these unique water-insoluble polymers. Additionally, the awarding of this patent in Mexico is a further example of the growing recognition of our Chelok technology by the international scientific community."

### About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok<sup>®</sup> is Periodic Products' patented chelating technology, and gives Periodic Products' polymers the power to rapidly and permanently remove metals from water. For more information on our technologies, visit [www.periodicproducts.com](http://www.periodicproducts.com)

### Forward-Looking Statements

To the extent any statements made in this release contain information that is not historical, these forward-looking statements are based on the current expectations of the management of Periodic Products only, and are subject to a number of factors, risks and uncertainties, including the acceptance and demand for new products, the impact of competitive products and pricing, new product development and launch, reliance on key strategic alliances, availability of raw materials, availability of additional intellectual property rights, availability of future financing sources, the regulatory environment, and other risks the Company may identify from time to time in the future that could cause actual results to differ materially from those described in the forward-looking statements.
