

FOR IMMEDIATE RELEASE

Periodic Products Awarded Indonesian Patent on Fundamental Technology for Metal-Binding Polymers

Fort Lauderdale, FL – July 24, 2013

Periodic Products today announced that the Company has received notice of an Indonesian Deeds of Letters Patent number P0033301, which covers fundamental aspects of the Company's Chelok® metal binding technology. This proprietary technology is applicable to multiple metal binding applications in several areas, including water purification and treatment, mining operations, and corrosion prevention.

“We're especially pleased with the continued recognition of our Chelok technology in foreign markets,” said Joseph Laurino, CEO and founder of Periodic Products. “This represents our fifth international patent for our Chelok technology, and further supports the Company's growing intellectual property portfolio.”

About Periodic Products

Periodic Products is committed to advancing a cleaner and safer global environment through the application of responsible science and breakthrough chemical technologies. Chelok® is Periodic Products' patented chelating technology, and gives Periodic Products' polymers the power to rapidly and permanently remove metals from water.
